

AgedCareAI™

Transforming Aged Care with AI

ABOUT US.

Innovation Philosophy Pty Ltd | AgedCareAI

Innovation Philosophy Pty Ltd is dedicated to leveraging advanced data analytics and AI to transform industries. Our mission is to drive innovation and operational excellence, empowering organizations to achieve new heights of efficiency, quality, and performance.

Introducing AgedCareAI

AgedCareAI is our flagship AI-driven platform designed specifically for the Aged Care industry. It harnesses deep learning and advanced data analytics to provide comprehensive insights and streamline operations, driving better care, operational efficiency, and enhanced client satisfaction.

HOW CAN WE HELP YOU?

Transforming Aged Care Management

AgedCareAI integrates seamlessly with existing systems to deliver robust reporting and analysis capabilities. It helps identify potential health issues early, optimize decision-making, and automate routine tasks, saving staff time and allowing for more personalized interactions with clients.

Compliance and Quality Assurance

AgedCareAI is designed to support the Australian Privacy Principles and the Privacy Act 1988 (Cth). It also helps organizations meet the Aged Care Quality Standards, ensuring the highest standards of care and governance.

THE AGEDCAREAI SUITE

DESIGNED SPECIFICALLY FOR
THE AGED CARE INDUSTRY

AgedCareAI | 360View

360View revolutionizes how you manage and access data by integrating information from multiple sources, such as clinical software, complaints, tasks, nurse call systems, finance, and rostering and other sources. This comprehensive module offers a unique user interface that presents all relevant data in an accessible and intuitive manner, ensuring that you have a complete view of every resident's needs and status.

AgedCareAI | AskMe

AskMe simplifies access to crucial information about policies, procedures, and resident data. Using plain English queries or one of the other 50 languages that our system supports, staff can retrieve information effortlessly without navigating complicated systems. This intuitive interface enhances productivity and ensures that critical information is always at your fingertips.

AgedCareAI | Whisper

Acts as an interactive assistant, providing real-time feedback and communication through wireless earphones. This innovative module allows staff to receive immediate guidance and support while on the move, enhancing their ability to respond quickly to residents' needs. By facilitating seamless communication, Whisper ensures that staff remain connected and informed, leading to more effective and responsive care delivery.

AgedCareAI | Assist

The Assist module streamlines administrative tasks by providing template forms and intelligent prompts. This significantly improves workflow efficiency by automating routine documentation processes, freeing up staff time to focus on more personalized interactions with residents. Assist reduces the likelihood of errors and ensures consistency in the quality of care provided.

AgedCareAI | Insights

The Insights module utilizes clinical data to offer a holistic view of care and operations. It provides summaries and compliance checks, automating daily tasks and reminding you of important actions that might have been overlooked. With solutions accessible through a single click, Insights makes AI user-friendly and highly effective in improving care quality and operational efficiency.
